

256GB Computer memory DDR4 for Gigabyte MU72-SU0 (rev. 1.x/2.x) LRDIMM 3DS

verified quality memory 5 years warranty Warranty details see last page 100% compatible free support on our hotline

fast delivery

PHS-memory® - computer memory with 100% quality

- many years of IT competence
- Free support for optimal configuration and product selection
- High availability through professional warehouse management
- Fast delivery in throughout Europe
- Short response times and professional order processing due to full digitalization throughout the entire process with complete traceability
- Incoming goods inspection include checks of the DRAMs, PCBs and the programmed SPDs in order to exclude possible errors (Controlled BOM).
- PHS-memory® brand memories guarantee 100% compatibility to the specified system.
- PHS-memory® memories can be used together with existing memories in the device depends on to the configuration rules of the system.
- The "fallback option" in the SPD of PHS-memory® allows DRAMs with higher clock rates to be operated together with older memory modules with lower clock rates within the system.
- Products with unique serial number for service and warranty
- Pre-sales and after-sales support by technically trained personnel

Memory Specification

Memory size	256GB		
Memory technology	DDR4 yes		
ECC support			
JEDEC Norm	PC4-25600-L		
DRAM Organization	3DS 4H 16Gx4		
Rank	8Rx4 (2S4Rx4)		
Туре	LRDIMM (ECC LR DIMM) 3DS		
Number of pins	288 Pin DIMM		
Memory data transfer rate	3200MHz @ CL22		
Voltage	1,2 Volt		
Speciality	3DS		
Board dimensions	133,35 x 31,25 (LxB mm)		
Operating temperature	0° C - 85° C		
Storage temperature	-40° C - +95° C		
RoHS compliant	yes		
SKU	SP438779		
EAN	4067488022234		

Note: The module specified in this datasheet is one of several possible configurations available under this part number.

Some details may differ from the specifications described here and the illustration, but have no negative influence on the functionality.

System Specifications

The memory is 100% compatible with this sytem:

System manufacturer	Gigabyte	
Device type	Motherboard-memory	
Device family	Server-Motherboard	
Device series	MU72 Serie	
Device name	MU72-SU0 (rev. 1.x/2.x)	
Maximum memory*	2TB	
Number of memory sockets	8	
Device series Device name Maximum memory*	MU72 Serie MU72-SU0 (rev. 1.x/2.x) 2TB	

^{*} The specifications for the maximum memory upgrade may differ from those of the manufacturer Gigabyte. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.

Information on memory allocation

Information on memory configuration

The following technical specifications should be considered in advance:

- The system supports RDIMM and RDIMM 3DS (Registered DIMM) or LRDIMM and LRDIMM 3DS (Load Reduced DIMM) memory modules. Large memory capacities can be realised with LRDIMM 3DS modules.
- RDIMM and RDIMM 3DS memory modules cannot be operated together with LRDIMM and LRDIMM 3DS main memories.
- If a memory expansion is to be made with the already existing RAM memories, it must be checked which basic memory technology (RDIMM / LRDIMM) is available.
- When using a multiprocessor system, the memory slots should always be configured identically for each CPU.
- Memory slots without a processor may not be used.
- If memory modules are provided with higher speeds than specified by the system, the memory speed is automatically adjusted to the system specifications.

Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
 - Do not touch the gold pins of the memory module $% \left(1\right) =\left(1\right) \left(1\right) \left($
 - Only touch the sides of the memory module
 - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.

Further memory options for Gigabyte MU72-SU0 (rev. 1.x/2.x)

		Technology	Туре	Number of pins	Brand	Reference no.
8GB SP47	74793 [RDIMM (ECC Registered)	288 Pin DIMM	PHS-memory®	
16GB SP43	34272 [RDIMM (ECC Registered)	288 Pin DIMM	PHS-memory®	
32GB SP43	34273 [RDIMM (ECC Registered)	288 Pin DIMM	PHS-memory®	
64GB SP43	34274 [RDIMM (ECC Registered)	288 Pin DIMM	PHS-memory®	
64GB SP47	74791 [LRDIMM (ECC LR DIMM)	288 Pin DIMM	PHS-memory®	
128GB SP43	34271 [RDIMM (ECC Registered) 3DS	288 Pin DIMM	PHS-memory®	
128GB SP43	34270 [LRDIMM (ECC LR DIMM)	288 Pin DIMM	PHS-memory®	
128GB SP47	74792 [LRDIMM (ECC LR DIMM) 3DS	288 Pin DIMM	PHS-memory®	
256GB SP43	38781 [RDIMM (ECC Registered) 3DS	288 Pin DIMM	PHS-memory®	
256GB SP43	38779 [LRDIMM (ECC LR DIMM) 3DS	288 Pin DIMM	PHS-memory®	

PHS-memory® warranty

Every PHS-memory® is equipped with a 5-years-warranty of perfect operation. If the RAM module is defective or fails within 5 years of purchase when used properly, you will receive an appropriate RAM module free of charge. If a suitable memory module is no longer available, we will refund the purchase price.
