Your benefits

- ✓ verified quality memory
- ✓ 5 years warranty
Warranty details see last page
- ✓ 100% compatible
- ✓ free support on our hotline
- ✓ fast delivery

PHS-memory® - computer memory with 100% quality

- many years of IT competence
- Free support for optimal configuration and product selection
- High availability through professional warehouse management
- Fast delivery in throughout Europe
- Short response times and professional order processing due to full digitalization throughout the entire process with complete traceability
- Incoming goods inspection include checks of the DRAMs, PCBs and the programmed SPDs in order to exclude possible errors (Controlled BOM).
- PHS-memory® brand memories guarantee 100% compatibility to the specified system.
- PHS-memory® memories can be used together with existing memories in the device - depends on to the configuration rules of the system.
- The "fallback option" in the SPD of PHS-memory® allows DRAMs with higher clock rates to be operated together with older memory modules with lower clock rates within the system.
- Products with unique serial number for service and warranty
- Pre-sales and after-sales support by technically trained personnel

Memory Specification

Memory size	48GB
Memory technology	DDR5
ECC support	ja
JEDEC Norm	PC5-38400-P
DRAM Organization	3Gx8
Rank	2Rx8
Type	SO DIMM ECC
Number of pins	262 Pin SO DIMM
Memory data transfer rate	4800MHz
Voltage	1,1 Volt
Speciality	-
Operating temperature	0° C - 85° C
Storage temperature	-40° C - +95° C
RoHS compliant	Yes
SKU	SP579962
EAN	4069169599943

overRAMing - maximize your RAM

Most systems - including the Asustor Flashstor 6 Gen2 (FS6806X) - can be upgraded with more memory than originally specified by the device manufacturer.

Therefore, our memory specialists continuously analyze new memory solutions in selected systems. Due to improved manufacturing technologies, new memories with higher performance and capacity will be tested for stability and functionality.

Then the new memory solutions are released for the respective systems. Use the benefits of larger computer memory capacity with the PHS-memory® overRAMing memory solutions.

<https://www.phs-memory.es/-BOR>

Note: The module specified in this datasheet is one of several possible configurations available under this part number.
Some details may differ from the specifications described here and the illustration, but have no negative influence on the functionality.

System Specifications

The memory is 100% compatible with this system:

System manufacturer	Asustor
Device type	Storage/NAS
Device family	Flashstor
Device series	FS6800 Serie
Device name	Flashstor 6 Gen2 (FS6806X)
Standard memory	8GB (1x8GB)
Maximum memory*	96GB / 64GB according to manufacturer
Number of memory sockets	2

* The specifications for the maximum memory upgrade may differ from those of the manufacturer Asustor. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.

Memory modules with our overRAMing-symbol are approved by us for maximum memory expansion.

Information on memory allocation

Information on memory configuration

The following technical specifications should be considered in advance:

- Im Gerät können non ECC or ECC (Error-Correction-Code) RAM-memory installiert werden. Memory with der Description ECC besitzen eine Fehlerkorrektur.
- Non ECC memory modules cannot be used together with ECC memories.
- If a memory expansion is to be made with the already existing RAM memories, it must be checked which memory technology (non ECC / ECC) is already existing in the system.

Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
 - Do not touch the gold pins of the memory module
 - Only touch the sides of the memory module
 - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.

Further memory options for Asustor Flashstor 6 Gen2 (FS6806X)

Size	SKU	Technology	Type	Number of pins	Brand	Reference no.
8GB	SP579955	DDR5	SO DIMM	262 Pin SO DIMM	PHS-memory®	AS-8GD5
16GB	SP579960	DDR5	SO DIMM ECC	262 Pin SO DIMM	PHS-memory®	AS-16GECD5
16GB	SP579956	DDR5	SO DIMM	262 Pin SO DIMM	PHS-memory®	AS-16GD5
24GB	SP579957	DDR5	SO DIMM	262 Pin SO DIMM	PHS-memory®	
32GB	SP579961	DDR5	SO DIMM ECC	262 Pin SO DIMM	PHS-memory®	AS-32GECD5
32GB	SP579958	DDR5	SO DIMM	262 Pin SO DIMM	PHS-memory®	AS-32GD5
48GB	SP579959	DDR5	SO DIMM	262 Pin SO DIMM	PHS-memory®	AS-48GD5
48GB	SP579962	DDR5	SO DIMM ECC	262 Pin SO DIMM	PHS-memory®	AS-48GECD5

PHS-memory® warranty

Every PHS-memory® is equipped with a 5-years-warranty of perfect operation. If the RAM module is defective or fails within 5 years of purchase when used properly, you will receive an appropriate RAM module free of charge. If a suitable memory module is no longer available, we will refund the purchase price.
