System Specifications

The memory is 100% compatible with this system:

System manufacturer	Lenovo
Device type	Server
Device family	ThinkSystem
Device series	SR645 Serie
Device name	ThinkSystem SR645 V3 (7D9D / 7D9C)

Annotation	Beim Systemstart wird bei diesem System eine spezielle memoryabfrage gestartet. Die memory des Systemherstellers (manufacturer Original) besitzen neben den technischen Kennziffern noch eine manufacturernummer. Anhand der manufacturernummer erkennt das System die memory als "qualifiziert". Bei den kompatiblen memoryn ist diese manufacturernummer nicht vorhanden. Die technischen Kennziffern sind identisch. Beim Einsatz der kompatiblen memory muss beim Systemstart eine Meldung per Taste bestätigt werden. Nach dieser Bestätigung funktionieren die kompatiblen memory ebenfalls problemlos im System.

* The specifications for the maximum memory upgrade may differ from those of the manufacturer Lenovo. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.
